

NET Maps is a lightweight, web-based information portal for the fast and automated provision of network information. True-to-scale maps and plans can be created within a very short time and securely provided to both internal and external users.

All information requests are automatically documented and archived, ensuring traceable and audit-proof information provision. The module is an add-on that requires other NET modules.

Selected Features and Workflows

Features

- **Map Information:** Creation of true-to-scale network and route information at the push of a button.
- **Templates & Layouts:** Custom plot templates, scales, and page layouts for standardized outputs.
- **Search & Navigation:** Quick location of addresses, objects, and network areas.
- **User Management:** Secure access for internal and external users through role-based permissions.
- **Documentation & Archiving:** Automatic logging and audit-proof storage of all information provided and user queries.

Technical Information

Licensing Model

- **Subscription Licenses:** The software is provided under an annually renewable system subscription license with different query packages. The license includes an unlimited number of users.

Support

- **Telephone hotline:** Mon–Fri, 07:00–17:00 (local time)
- **Ticket system:** 24/7 submission, processing during business hours
- **Available separately:** Extended support, individual project assistance, and custom software modifications

Installation Options

- Add-on for NET Cloud

Requirements

- NET Cloud and NET Engineering
- The requirements of the combination products apply

Combination Products

The combination of **NET Cloud** and **NET Maps** enables the straightforward provision of up-to-date network data in the form of digital map information. Maps and plans can be created and managed centrally and securely provided to internal and external users. The projects in **NET Engineering** serve as the basis for this.
